TOP SKILLS

TypeScript · JavaScript · Java · PHP · React · Next.js · Laravel · SQL · System Design · Mentoring · Project Lead · Team Lead · AI Feature Development · Test-First Development

EXPERIENCE

Senior Software Engineer **Quilt** **Provo, UT: May 2026 - Present**

- Reduced customer churn by implementing a new UI for the entire project in JavaScript.
- Improved confidence in future releases by introducing Playwright end-to-end tests.
- Increased revenue by implementing AI features like custom report generation in PHP.

Senior Software Engineer **Canopy** **(Remote) UT: Apr 2025 - Mar 2026**

- Reduced costs building scalable microservices in Java, Kotlin, Python and PostgreSQL.
- Increased revenue by co-implementing AI driven features like auto filling forms and questionnaire generation. (Increased ARR by 150k in the first 30 days of release)

Founding Engineer (Part-time) **Build Hub** **(Remote) UT: Sept 2023 - Mar 2025**

- Designed the initial objects, systems, and database tables, built in PHP and Laravel.
- Reported milestone progress to technical and non-technical stakeholders.

Senior Software Engineer **Loveland Innovations** **PG, UT: May 2023 - July 2024**

- Reduced customer churn and increased revenue by launching IMGING Inspect and the end of 2023 using TypeScript, Java, Spring Boot, Angular, and PostgreSQL.
- Doubled the release cadence and improved communication between technical and non-technical stakeholders by leading a change in process from waterfall to agile.

Software Engineer **Alarm.com** **Provo, UT: Jan 2019 - Mar 2023**

- Reduced customer churn by including new features to our robust REST API in PHP and MySQL. This API was used in house but was also sold to 3rd party providers.
- Created new revenue streams by constructing and launching an extendable integration between SecurityTrax and any number of consumer financing systems.
- Boosted new engineers' productivity by 50% by restructuring our onboarding process.
