TOP TECHNOLOGIES

Java | Kotlin | PHP | Golang | JavaScript | TypeScript | Angular | React | SQL | NoSQL | AWS

EXPERIENCE

Senior Software Engineer **Canopy** **(Remote) UT: Apr 2025 - Mar 2026**

- Owned development and scaling of our API microservice systems in Kotlin, and Python.
- Launched and co-implemented AI features like generating questionnaires and auto filling forms for clients. Increasing ARR by \$150k in the first 30 days of release.
- Incorporated AI directly into my daily workflow, using Claude, and Copilot.

Founding Engineer **Build Hub** **(Remote) UT: Sept 2023 - Mar 2025**

- Evaluated the different trade-offs for language and technologies, created the initial models, system, and database design. Engineered the first implementation of the API.

Senior Software Engineer **Loveland Innovations** **PG, UT: May 2023 - July 2024**

- Implemented and launched features including IMGING Inspect using Java, Angular, and PostgreSQL. Inspect reduced customer churn and created new insurance sales revenue.
- Updated onboarding, developer documentation, and junior engineer mentoring. After 4 months I was assigned to onboard new engineers, and oversee documentation.
- Lead a transition from waterfall to an agile process, doubling the rate of releases.

Software Engineer **Alarm.com** **Provo, UT: Jan 2019 - Mar 2023**

- Implemented solutions from idea to deployment for our REST API in PHP and MySQL.
- Constructed and launched an extendable integration between SecurityTrax and any number of consumer financing systems, opening new revenue streams for the company.
- Performed technical interviews and updated the software engineer onboarding program, leading to 50% more productivity for new engineers in the first six months.

Software Engineer **InsideSales.com** **Provo, UT: May 2017 - Nov 2018**

- Chosen to help spearhead a new team to remake the Powerstandings product using Golang, React and Redux along with integrations with Salesforce and Playbooks.

Software Engineer **Fishbowl** **Orem, UT: Apr 2016 - May 2017**

- Maintained and updated the Fishbowl Commerce system using Java Spring, and Angular, including integrations with other systems like Shopify, eBay, and more.

EDUCATION **Utah Valley University, B.S. Software Engineering**
